

CENTER FOR INNOVATION AND CALCULATION

Structural calculations and simulations
Coordination of interdisciplinary tasks

Management / Finance
HR / Accounting

Corporate strategy /
Corporate development

BUILDING MATERIALS AND BUILDING PHYSICS

LOAD-BEARING STRUCTURES AND SOUND INSULATION

STRUCTURAL FIRE PROTECTION

GEOTECHNICS

Mineral building materials
Metal construction, fastening and joining technology
Material analytics and corrosion

Experimental construction mechanics
Structural engineering | BELFA
Sound insulation

Fire behaviour of building materials
Fire resistance of building products and structural components
Fire resistance of special constructions

Structural sealing
Pipe testing center
Soil and road construction laboratory, aggregates
Environment and water protection, sustainability

Structural repair and monitoring

Building physics and masonry

Timber construction

■ Certification body
■ Testing laboratory

Central administration

Quality and test equipment management /
Data protection

Systemadministration

corporate communication /
marketing

Investment management

Section of testing, inspection and certification
